Date	06 July 2026
Team ID	XXXXXX
Project Name	Voice Based Concept Understanding Analyser
Maximum Marks	3 Marks

Define Problem Statements

Students and learners often explain concepts during interviews, presentations, or academic activities. However, they do not receive immediate and objective feedback on whether their explanation is conceptually correct or whether their speech is fluent and confident. Manual evaluation by teachers or mentors is time-consuming and may not always be available. Therefore, there is a need for an AI-powered system that can automatically analyze spoken explanations, evaluate conceptual understanding, assess communication skills, and generate detailed feedback with performance reports.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A student, learner, or interview candidate	Explain a concept using my voice and evaluate my understanding and communication skills	I do not know whether my explanation is conceptually correct or whether I spoke clearly	Manual evaluation by teachers or mentors is not always available, and it takes time to receive feedback	Uncertain about my knowledge, communication skills, and overall confidence
