

Brainstorming & Idea Prioritization

Date	05 July2026
Team ID	xxxxxxx
Project Name	Voice Based Concept Understanding Analyser
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Harshitha Makina	Use OpenAI Whisper + Sentence-BERT to transcribe speech and evaluate conceptual correctness against a reference explanation	Core AI Module	1
2	Meghana Maddula	Detect filler words (um, uh, like) using NLTK, and analyze pauses + voice energy using Librosa for a fluency/confidence score	Speech Fluency	2
3	Avinash Rayavarapu	Build an interactive Streamlit dashboard with audio upload, playback, and waveform visualization (Matplotlib)	UI/UX	3
4	Ushaswini Kakarlamudi	Generate a downloadable PDF report summarizing the transcript, scores, and feedback (ReportLab)	Reporting	4

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Speech-to-text (Whisper) + semantic comparison (Sentence-BERT) to evaluate conceptual correctness	High	High	1	Yes
2	Filler word detection (NLTK) + pause/energy analysis (Librosa) to score speech fluency and confidence	High	Medium	2	Yes
3	Streamlit dashboard with waveform display and downloadable PDF report (Matplotlib + Report Lab)	High	Medium	3	Yes
